

BEVELBACK WEATHERBOARD

Width: Cover = 812mm Sheet = 842mm.
 Applications: Commercial and residential.
 Orientation: Horizontal wall cladding only.

Manufactured in Palmerston North. Available nationwide.

FASTENING PATTERN

Bevelback to be fixed on every bevel at positions shown to the right.
 10-12 Gauge screw, length to suit with a minimum 30mm embedment into timber.

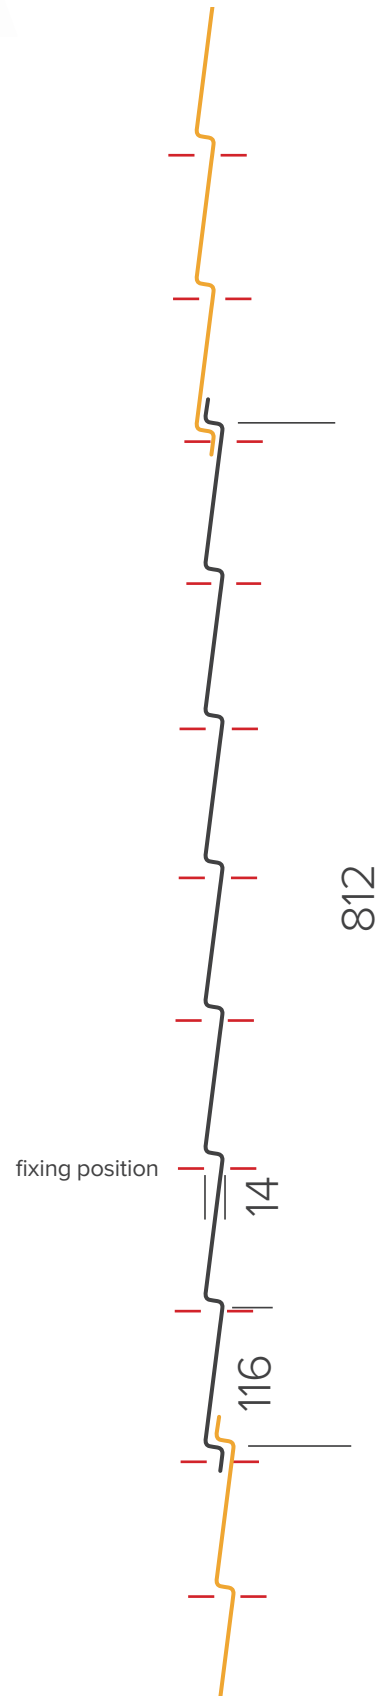

Fixings at 600mm max centres upto Extra High wind zone to NZS 3604.

SHEET LENGTHS

The NZMRM Code Of Practice states maximum sheet length for dark coated steel with normal fixing patterns should be a maximum of 15m.

Metalcraft Roofing's Bevelback sheet lengths to be 15m or less.
 For longer lengths then a vertical butt joint detail can be used.
 Refer to Metalcraft Roofing's standard details.
